SECURITY DIVIDER

DELIVERING PEACE OF MIND WITH OUR NEW SECURITY DIVIDER SERVICE.

Because we know your business so well, we understand that some shipments require special care – and an increased level of security. So we offer our new Security Divider Service, which features locked-in security for nose-loaded, special or uncrated, non-containerized freight. The system keeps your special freight tightly packed behind a wall of plywood that's secured with deck bars, one of which is locked in place until it's opened with bolt cutters in the presence of the consignee.

OUR SECURITY DIVIDER SERVICE OFFERS YOU:

- **CONFIDENCE** – IT'S A GREAT OPTION FOR SHIPPING YOUR UNPACKAGED, SENSITIVE OR FRAGILE CARGO SAFELY AND SECURELY.
- **SECURITY** – YOUR FREIGHT IS LOCKED SECURELY INTO PLACE AT ITS ORIGIN AND ISN'T UNLOCKED UNTIL IT REACHES ITS FINAL DESTINATION.*
- **LOSS PREVENTION** – BY MINIMIZING HANDLING, DAMAGED OR MISDIRECTED FREIGHT BECOMES A THING OF THE PAST.
- **ONLINE VISIBILITY** – OD'S STATE-OF-THE-ART TECHNOLOGIES WORK TOGETHER TO GIVE YOU REAL-TIME TRACKING AND TRACING ON YOUR SHIPMENT.
- **AFFORDABILITY** – PAY ONLY FOR THE SPACE YOU USE.

HOW DOES OD SECURITY DIVIDER SERVICE WORK?

1

The shipper loads freight into the nose of a deck trailer.

2

A frame is placed on the trailer floor against the freight. This frame consists of two 2 x 12s and one 1 x 8.

3

Two pieces of 4 x 8 plywood or chipboard are placed in the frame.

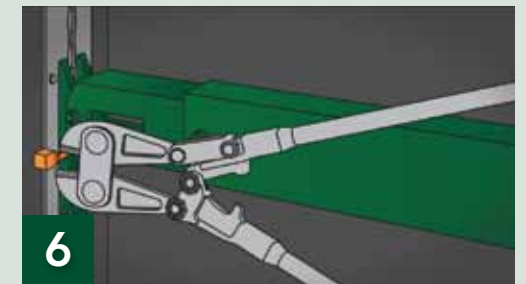

4

Two deck bars are dropped in front of the panels. The empty space can be filled with air bags.

5

A lock is placed in the drilled hole of one of the deck bars.

6

Once the freight is delivered, the lock is removed with bolt cutters in the presence of the consignee.
